Design, Additions, Renovations

Dylan Fruchey, a registered Architect, has more than 4 years of experience in Architecture, design, and project management. His role focuses on design, client interaction, and project administration; all while overseeing the project from its inception to its completion. This includes working with clients on the project's initial design, assisting and overseeing the production of design drawings and details, specification writing, project bidding, and construction administration or management.

Dylan joined the company as an intern in the Summer of 2021 and began assisting in construction document preparation, while learning the architecture profession as a mentee. After graduating in the spring of 2023, he joined the Encompass team full-time, and became licensed in the state of Ohio in 2024, which allowed him to garner meaningful experience rather quickly. Past project experience includes a wide variety of project types, both new builds and renovation, including commercial, education, food service/restaurants, medical, residential, automotive, and recreational.

Dylan aims to provide a hands-on approach as the Architect. This consists of regular design meetings and client conversation, construction site visits and meetings for coordination, and transparency and open communication through all stages of the project.
